Pricing Page Guide

A Stripe Lab sample download

One-time: charge once, deliver a key or a file. Simple, but no recurring revenue.
Subscription: bill monthly or yearly for ongoing access. Plan for upgrades, downgrades, failed renewals and cancellations.
Usage-based: meter what customers consume and bill at the end of each period.
Prepaid credits: sell units upfront and deduct them as customers act.

Whichever you choose, grant access from the webhook, never from the success page.
